

Partnership announcement VINEU & HSAD

WE ARE PROUD TO ANNOUNCE OUR PARTNERSHIP AGREEMENT WITH HSAD

On December 21, 2021, with the set of goals and vision in common, the partnership agreement has been signed to announce the strategic partnership between **Vietnam Innovation Network in Europe (VINEU)** and **Holding Space AD (HSAD) Limited**.

VINEU and HSAD share the similar target to foster innovation projects between European – Vietnamese – Middle East regions, while connecting startups, investors, businesses, governments, and other important stakeholders to make the most out of the values for all.

As a clear endorsement of the partnership, VINEU has invited HSAD to coordinate regional efforts in attracting FDI into Vietnam from the GCC, as well to provide corporate innovation services that will help build the start-up and innovation ecosystem by leveraging long-term strategic partnerships with global institutions. On the other hand, VINEU will offer the expertise, experiences, partner in the network and take the leading role from its side in sustainably developing the cooperation between VINEU and HSAD.

In the signing ceremony, VINEU’s President – Dr. Viet Anh Nguyen pointed out “Vietnam always attaches great importance to strengthening the system of cooperation and ownership with the Middle East region and emphasizes the multi-faceted cooperation systems. The main cooperation and external relations create a solid foundation, contributing to promoting many aspects of economy, investment, trade, science, etc. between the respective nations. I hope and believe that the strategic partnership between VINEU and HSAD will help Vietnam and the Middle East region in developing sustainable goals”.

Additionally, Holding Space AD Chief Executive Preston McIntyre expressed his excitement around the joint-venture stating: “We are thrilled to partner with an institution such as VINEU. Vietnam is a burgeoning country with a great capacity to become a world leader in the tech space as it is already home to thousands of digital nomads. We see the opportunity to unite these brilliant minds with local entrepreneurs to solve global problems through the intentional design of building the future.”

Through this partnership, our two organizations have the opportunities to expand the markets, bring valuable solutions for potential innovation projects, and boost the investment opportunities between the participating countries.
